BRUSSELS; July 08, 2022 — We are pleased to announce that Vivansa has successfully passed the Cyber Essentials (CE) certification. Cyber Essentials is an effective, UK Government-backed scheme that contributes to protecting against a whole range of the most common cyber attacks. We believe that the correct application of this scheme is a key asset in securing Vivansa's strategy to provide Cloud-based solutions to our Customers.

The certificate certifies that the whole Vivansa organisation was assessed as meeting the Cyber Essentials implementation profile and thus that, at the time of testing, the organisation's ICT defences were assessed as satisfactory against commodity-based cyber attacks.

Vivansa CE certificate 2022 #IASME-CE-045663

1 file(s) 144 KB

Cyber Essentials is a UK government-backed scheme verifying organisational cybersecurity standards against common threats. The certification validates five key technical controls: boundary firewalls, secure configuration, access control, malware protection,…
